

## **of Hydro Extrusion Poland sp z o.o.**

**Hydro Extrusion Poland** specialises in the comprehensive performance of services related to the production, processing and refining of aluminium profiles for industry, including the automotive industry.

Our goal is to produce at optimum cost while respecting the environment. Hydro is aware that energy consumption affects the environment and the costs of running a business. To increase the competitiveness of our products and services, we strive to improve our energy performance through technical and organisational measures related to the implementation of the principles of the Energy Management System in accordance with ISO 50001:2018.

**Hydro Extrusion Poland** undertakes to the following:

- ensure the availability of information and resources necessary to effectively achieve goals for relevant functions and levels as well as specific energy objectives;
- continuously improve the energy management system and energy performance;
- comply with relevant legal and other requirements relating to energy efficiency and the use and consumption of energy;
- support project activities that address the improvement of energy performance;
- support the purchase of energy-efficient products and services that impact the energy efficiency result.

Our areas of activity are as follows:

- improvement of production and auxiliary processes by optimising them for improved efficiency;
- acquisition and implementation of modern, energy-efficient technologies, equipment, and services that affect energy efficiency results;
- constant search for new solutions, in support of design, to improve the energy efficiency results and improve the energy management system;
- reduction of the energy expenses by optimising energy consumption and usage of alternative sources;
- regular reporting on energy consumption to our employees and encouraging behaviour that supports energy saving;
- encouragement of energy efficiency measures among employees, suppliers, and subcontractors;
- provision of opportunities for the staff to contribute their own initiative and ideas to the improvement of the Energy Management System.

The Management of Hydro Extrusion Poland guarantees the necessary resources and means to implement this policy and ensures that the policy is understood, implemented, maintained, and communicated in all areas of the organisation.
